

# CONSULTA LOMBADA NO BRASIL

## 1. Lombadas no Brasil (apenas nodes, gera dados csv para criar alertas no Garmin):

```
[out:csv(::lon,::lat,::type)][timeout:900];
{{geocodeArea:Brasil}}->.searchArea;

(
  node["traffic_calming"="bump"](area.searchArea);
  node["traffic_calming"="hump"](area.searchArea);
  node["traffic_calming"="table"](area.searchArea);
);

out body;
>;
out skel qt;
```

## 2. Lombadas no Brasil (node/way/relation, visualiza no mapa, exporta gpx/kml): [bump, hump, table, sem yes]

```
[out:json][timeout:900];
{{geocodeArea:Brasil}}->.searchArea;

(
  node["traffic_calming"="table"](area.searchArea);
  way["traffic_calming"="table"](area.searchArea);
  relation["traffic_calming"="table"](area.searchArea);
  node["traffic_calming"="hump"](area.searchArea);
  way["traffic_calming"="hump"](area.searchArea);
  relation["traffic_calming"="hump"](area.searchArea);
  node["traffic_calming"="bump"](area.searchArea);
  way["traffic_calming"="bump"](area.searchArea);
  relation["traffic_calming"="bump"](area.searchArea);
);

out body;
>;
out skel qt;
```
